

Find the right piece the first time...quickly

CONSOLIDATED POWER SUPPLY

Nuclear Certified Products

The Value Proposition:

- Finding the right piece the first time.
- Finding the right piece very quickly.
- Knowing the right piece is on site.
- Knowing the right piece was installed.

The Solution:

- Our proprietary solution utilizes industry proven, intelligent long range active RFID tags and IntelliFind™ Mobile location software from Identec Solutions to provide the location of materials.
- The material can be quickly located by project / construction personnel, substantially reducing the time and cost associated with knowing what materials are currently on hand.
- Locating materials in the lay down yard is reduced from hours to minutes, which reduces labor costs and reduces safety risks.
- The solution provides visibility of the material's complete genealogy throughout the supply chain back to the mill, including all of the material's quality certifications.
- By reducing costs, increasing compliance, and eliminating unnecessary delays, construction projects can reap significant benefits from our solution.
- **No Infrastructure Required**
- **No Wireless Network Required**
- **No Software to Install or Maintain**
- **Easily Implemented at Any Project Stage**
- **Flexible Payment Options**
- **CII Field Test Results Published in ENR**
- **Industry Proven Technology**
